| Course Description                 | <p>It is a given that the twin concepts of transference and countertransference are fundamental to psychoanalytic psychotherapy. Both of these concepts have undergone an evolution of understanding throughout the twentieth century, and continue to be developed and refined. A selection of major psychoanalytic texts, from Freud to the Intersubjectivists is studied to familiarize the student with these concepts.</p> <p>To apply please e-mail <a href="mailto:PhilCTP@rogers.com">PhilCTP@rogers.com</a><br/>         For more information please see<br/> <a href="http://ctp.net/concentrations-seminars">http://ctp.net/concentrations-seminars</a></p> |                      |           |
